Q-UPID SCAN TEST SHEET

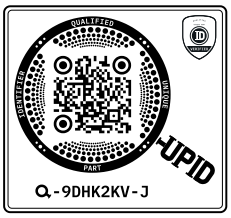

Print me at 100%

Print this page at **100 per cent**, with “fit to page” and scaling switched off, on your own printer and label stock. Then scan each code with the phones your customers use, from normal reading distance. Each code opens the live record for the first issued Q-UPID, **Q-9DHK2KV-J**. The smallest one that scans every time on every phone is your minimum for that printer and stock. Measure the printed width with a ruler: it should match the size shown.

Minimum
30 mm wide

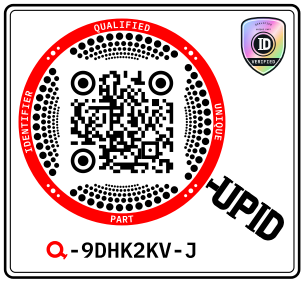

Colour

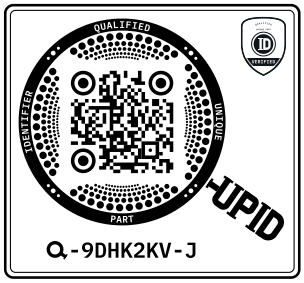

Black and white

Recommended
40 mm wide

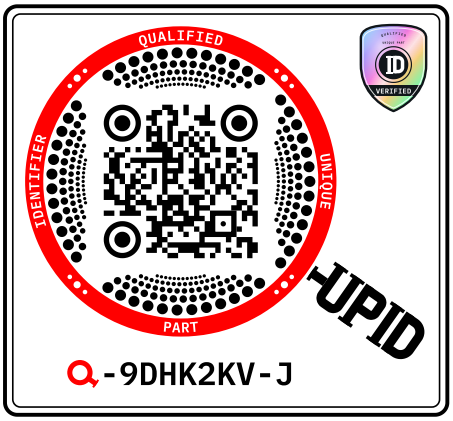

Colour

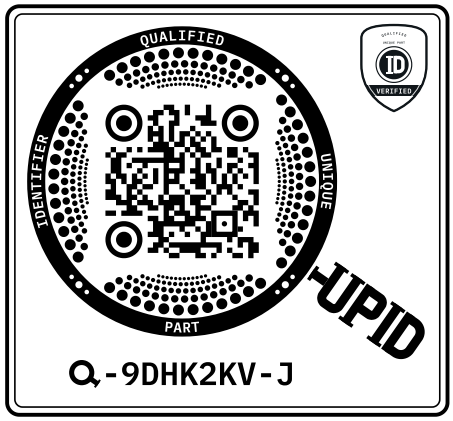

Black and white

Easy
60 mm wide

Colour

Black and white
